Constituency Nurturing System

Constituency Nurturing System is a comprehensive solution for political parties/candidates to manage constituency information in an easy and simple way. With the help of this tool you can maintain and enhance your relations with voters.

Click to Expand

JAN SAMPARK

JanSampark play a vital role because only through JanSampark you will be able to come closer to the voters. The voters can express their problems to you and you can take the possible steps to solve their issues. In this way your image will be high in voters mind and during the election times voters will vote for you.

WORK TRACKER

You can track the development works you have done in each & every Political Booth. It will help to decide what to do next to develop your Constituency area at micro level. Access to overall information can help to organize your further planning.

REPORTS

This system can generate various analytical reports related to Voter Demography, Development works and other activities.
